Questions?
We've got answers.

Unpack Your Mattress

Step 1

Remove your current mattress. Place the compressed mattress onto your foundation. Using scissors, carefully cut the white plastic sleeve and remove it from the mattress. Be careful not to cut the mattress cover.

Step 2

After removing the plastic sleeve, carefully use scissors to cut the plastic bag and remove it from the mattress. Be careful not to cut the mattress cover.

Step 3

Your mattress will begin to unfold before your eyes. While the mattress expands, do not pull or tear at it—and do not put anything on top to try to hold down the corners. The edges will regain their natural form after the mattress has recovered. It may take up to 48 hours for your mattress to fully expand.

Questions? Concerns?

If you have any questions or concerns about your memory foam product, please give us a call and speak to one of our better sleep experts.
